

MEET THE SHOWCASE

YOUR MOBILE WORKSTATION FOR ANY EVENT OR PRODUCTION

The Showcase – an advanced, multifunctional workstation packed in a robust flightcase. Designed for the dynamics of events and productions, the Showcase provides a complete workspace for a modern Event Control Center (ECC) that you can effortlessly take with you to any venue or location.

Whether you set up an Event Control Center, set up a show caller position, want to start presentations/videos or need a full production office: the Showcase adapts to your workflow. With its smart layout and professional finish, this mobile workstation is ready to use right out of the box. The Showcase is luxuriously finished and will not even look out of place at more formal corporate events.

The modular design allows multiple Showcases to be easily linked together to form a scalable Event Control Center. These do not necessarily have to be in the same room, but can also be spread over an event or even placed at a great distance. When using an Event Incident Management System, all users are connected to each other with the latest information of the event.

Via the integrated Central Control Unit (CCU), all data connections are processed quickly and reliably. Whether it's videos, CCTV, communication platforms, real-time data from sensors or other sources: everything is immediately available at the touch of a button on any Showcase and can be transferred to a video wall or other Showcase.

With the Showcase in the Event Control Center, you have real-time insight into everything that happens on the event site and beyond. Thanks to the seamless integration with sensors on location – from crowd monitoring to sound levels and weather conditions – all relevant data is clearly presented in the ECC. This allows different teams to work together seamlessly and you always maintain overview and control, even remotely.

Examples of linked sensors:

- **Counting systems:** From counting cameras to counting gates, always real-time insight into visitor numbers and flow analysis of parts of the event
- **Traffic sensors:** Monitoring access roads and parking solutions
- **CO₂ measurement:** Insight into air quality and ventilation needs
- **Sound measurement:** Insight into the sound levels produced at the event
- **Weather forecast:** Insight into the expected weather conditions
- **Incident registration:** Incident status overview of First Aid, Security and Production
- **Ticket scan counts:** Link with ticket scanners for numbers of visitors scanned inside in relation to the number of tickets sold
- **Drone support:** Support of Drone images at your event to support the safety organization

The Showcases are designed for convenience: sturdy, compact, reliable and can be set up in minutes. With just two connections – power and data – the workplace is immediately operational. Ideal for temporary or mobile situations at event sites, sports competitions, corporate events or other locations where fast, reliable deployment is crucial.

Why choose the Showcase?

- **Multifunctional:** Suitable for Event Control Centers, Showcalling, Media instarts, Show direction, Production workplaces and more.
- **Worldwide use:** With only an internet connection, the Showcase is immediately part of your event. Whether it's a single room or spread across multiple locations, a secure internet connection keeps you connected worldwide.
- **Mobile & robust:** The flightcase of the Showcase offers optimal protection during transport and is quickly operational on location due to its smart design.
- **Smart integration:** For maximum control with all the sensors present at the event.
- **Connecting sensors has never been easier:** Plug & Play integration ensures that you can switch quickly in the event of incidents, recognize trends and act proactively.
- **Plug & Play:** With only two connections - power & data - the workspace is immediately operational.

- **Modular design:** Customizable to your specific production needs.
- **Scalable:** From a single Showcase to a full set of multiple Showcases, easily scale with the size and complexity of your event.
- **Working smarter, safer events:** The Showcase makes your work as an event safety manager more efficient and effective.

Whether it's an exhibition, corporate event, festival, live stream, sports competition or international production: the Showcase is your reliable partner for a smooth and professional performance – small or large-scale.

The Showcases are powered by Crowd Care & Gigtech.
